

THE VAN RACKING
SPECIALISTS

90,000 vans fitted out since 1996!

- VAN RACKING • SHELVES AND DRAWERS
- FLOOR AND BODYWORK LINERS • ACCESSORIES • ROOF RACKS
- LOADING RAMPS • GENERATORS, INVERTERS AND COMPRESSORS

Super-complete mobile workshops

Patented transparent drawers

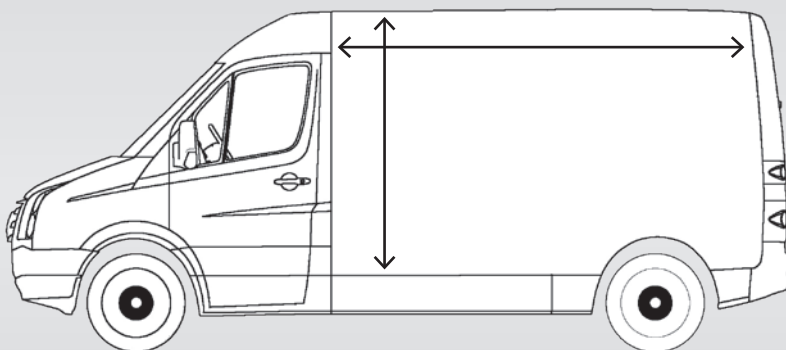

A wide range of accessories including ladder racks, generators, loading ramps

THE **47** POINT GUIDE
TO RACKING YOUR VAN

1

LOAD COMPARTMENT DIMENSIONS

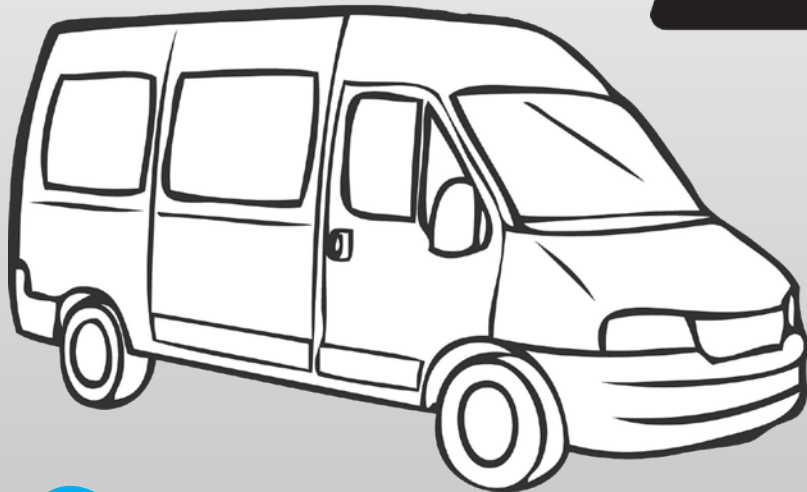

- Once you have chosen the make and model, give careful consideration to the length, width and height of the load compartment.
- In the case of small and medium size models like the Connect or Berlingo, the long wheelbase version can give you a significant increase in volume.
- If you need to work inside the van, especially on a work bench, make sure you have enough useful height.
- Most large, high roof vans offer around 180 cm of internal height. While sufficient for many people, this may not be enough for everybody.

2

LOAD CAPACITY

- The declarations of load capacity made by commercial vehicle manufacturers tend to be very optimistic and well above the real figures. Syncro System has made great progress in high technology materials and advanced manufacturing processes in order to reduce the overall weight of your racking, but don't forget that the total weight of your load is determined mainly by the materials you carry in the drawers and shelves.
- Contents, in the form of your working tools and materials, typically weigh 3 or 4 times more than the empty upfit.
- For example, van drawers and shelves weighing 200 kg when empty can well weigh 1000 kg when full.
- You should therefore choose a vehicle with a higher load capacity than you think you need. The price difference for a larger vehicle with a higher load capacity is generally modest, while the gain in safety is significant.

3

THE VAN FLOOR: A SOLID BASE

- The load compartment floor in a van is never perfectly flat and is also subjected to constant pressure by all the items of cargo carried in the vehicle.
- Since many manufacturers have started using thinner sheet metal in recent years, it is essential to reinforce the original floor with liners made from special plywood, aluminium, or even plywood+aluminium in the case of particularly heavy loads. This not only protects the vehicle's bodywork but also provides a rigid surface on which to install racking.

The widest choice of floor liners: 4 different types!

Marble-look plywood (12 mm) – Rubber-coated plywood (12 mm) – Aluminium tread plate – Two-layer plywood (9 mm) + aluminium tread plate.

Marble-look floor liner

info@syncro-system.com - <http://www.syncro-system.com/>

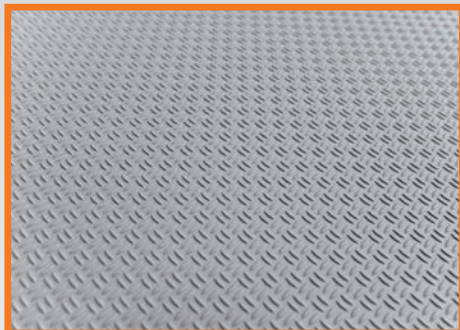

MARBLE-LOOK AND RUBBERCOATED PLYWOOD FLOOR LINERS

Syncro floor liners and other lining parts are available in two versions:

- If you want a bright floor surface that is easy to clean and long lasting too, our “marble-look” plywood floor liners are exactly what you need.
- “Rubber-coated” plywood with a relief, rice-grain surface for users who demand the ultimate in mechanical strength and grip.

Marble-look

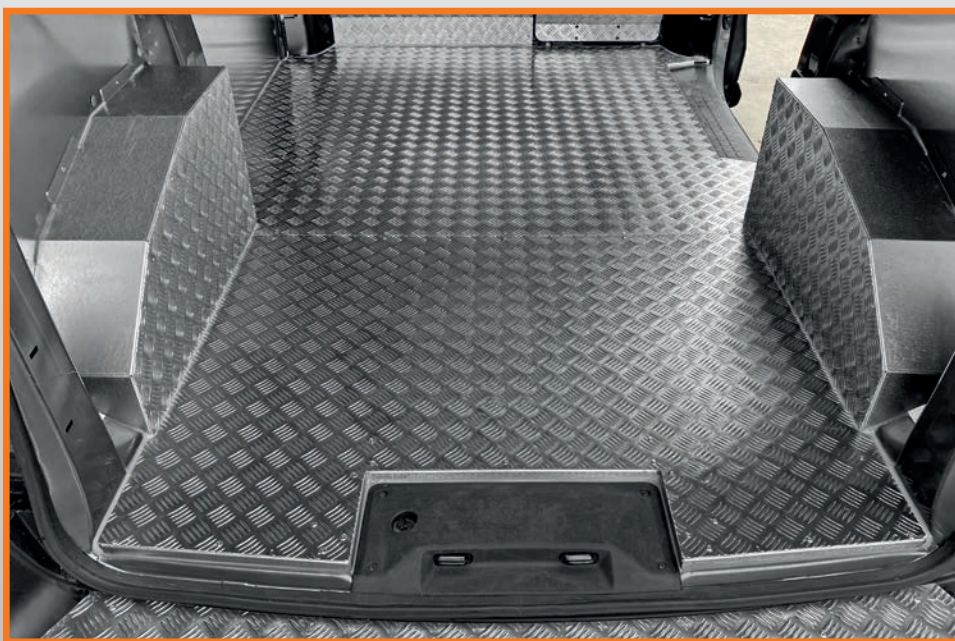

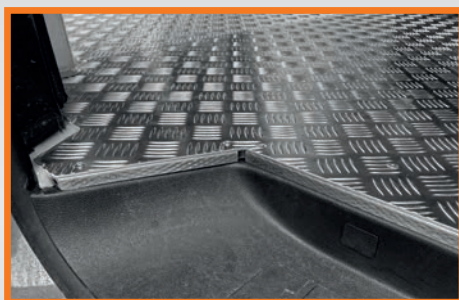

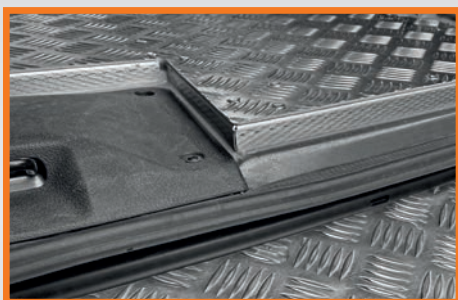

Rubber-coated

A set of rubber-coated floor liners

DOUBLE-LAYER FLOOR LINERS IN BIRCH PLYWOOD + ALUMINIUM TREAD PLATE: TOUGH ENOUGH FOR THE HEAVIEST LOADS!

- If you need to carry particularly heavy loads in your van, Syncro System can supply and fit a double-layer floor liner in birch plywood + aluminium tread plate. This heavy-duty liner comprises a bottom layer in 9 mm thick birch plywood, complete with all the spacers needed to prevent bending and sagging, plus a top layer in 2 + 1.8 mm thick aluminium tread plate. The plywood layer is protected by the addition of stainless-steel edging between the two layers at all the doors. The result is a floor liner that can withstand, without bending, any load you are likely to carry in your van.

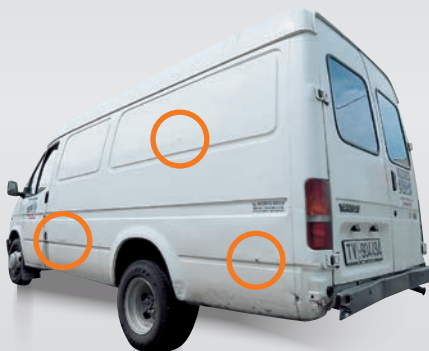

4

WALL AND BODYWORK LINERS

- New vans come with little or no protection for the interior.
- It is extremely easy to damage the body from the inside, and this generally leads to the formation of rust on the outside. The result in the long term is not only deterioration in your van's appearance but also potentially serious structural damage.
- In addition to floor reinforcement panels, Syncro System also provides protective linings for the sides and doors of the load compartment, the bulkhead, the wheel arches and even the underside of the roof.
- All our floor panels and interior linings come cut to size and predrilled, ready for installation.
- Installation takes no more than one or two hours!
- Ready-made linings are available for all makes and models of van!

**REPAIRING A VAN'S BODYWORK CAN COST THOUSANDS OF POUNDS:
FAR MORE THAN THE COST OF A SYNCRO SYSTEM LINING!**

The widest choice of materials:

Marble-look or rubber-coated plywood – honeycomb polypropylene – anodised aluminium – peraluman – aluminium chequer plate – painted steel sheet – aluminised steel sheet – stainless steel.

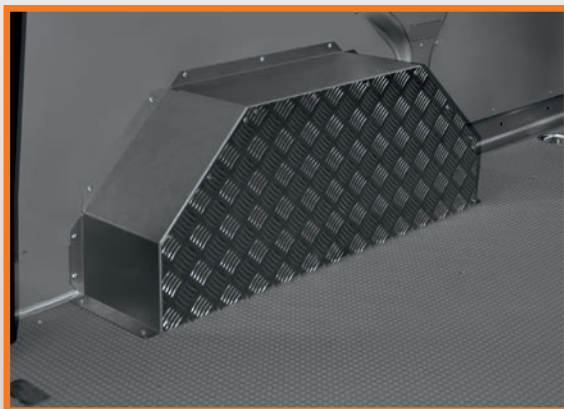

Roof liners

Plywood or aluminium bulkhead liners

Stainless-steel footplates

Wheel arch liners in steel and plywood or steel and aluminium chequer plate

Aluminium chequer plate footplates

5

ALL YOUR MATERIAL SECURE AND TIDY

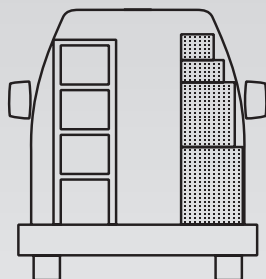

- If you have no system for storing and securing tools and equipment inside your van, all you can do is pile everything on to the van's floor when you travel to work.
- Every time you have to brake or swerve, all your equipment slides around, becomes entangled and even sustains damage.
- Syncro System racking allows you to store even large amounts of material securely and tidily.
- By exploiting vertical space, Syncro racking leaves a large part of your van's floor free for carrying extra equipment.
- Once stowed away in drawers and shelves, your tools and materials cannot slide around and remain immediately accessible whenever you need them. This saves you a great deal of time hunting for lost tools and saves you having to repurchase items you can no longer find.

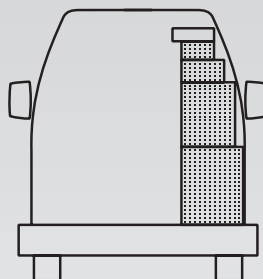

6

DIFFERENT DEPTHS

- All modern commercial vehicles have curved sides, so modules of different depth are essential in order to exploit available space to the full. Traditional vans shelves are designed for use against vertical sides.

Left: traditional shelves. Right: a Syncro racking system. The saving in space is obvious!

Modules offset in depth.

7

OFFSET MODULES

- Unlike traditional shelving, Syncro modules can be offset. This allows the bottom of the racking to be deeper than the top, or vice-versa, if you want certain modules to protrude into the load space.

info@syncro-system.com - <http://www.syncro-system.com/>

8

THE ONLY LIGHTWEIGHT, STRONG RACKING SYSTEM MADE FROM HIGH-STRENGTH STEEL WITH ALUMINIUM PARTS

- All Syncro System shelves and drawers, as well as other van racking modules, are made from high strength steel. Other modules are made from plastic, aluminium and wood.
- Thanks to their superior design and build, Syncro products are extremely light, strong and durable – a double saving because not only are they long lasting but their light weight means lower fuel consumption too!
- The use of high strength steel has allowed us to reduce material thickness by up to 30%.

DEFORMATION CAUSED BY A FORCE ON NORMAL STRENGTH STEEL

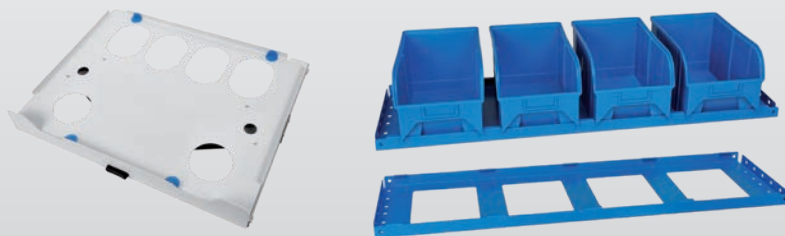

DEFORMATION APPLYING THE SAME FORCE TO HIGH STRENGTH STEEL

“Cut-Through” design

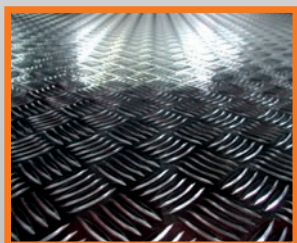

Wherever possible sheet metal parts are given a “CUT-THROUGH” design. Put simply, all unnecessary material is cut away. This design technology reduces weight by up to 30% - 40%.

Aluminium

Aluminium is widely used for internal linings and many other components like dividers for containers and shelves. It is also used to make accessories like cable holders, side pockets and various wheel arch unit, cabinet and case components.

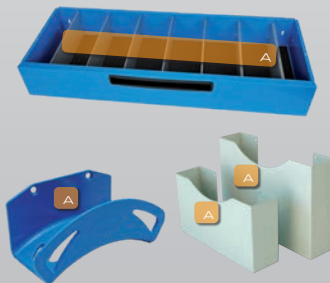

A - Aluminium

Aluminium tread plate

Example of an interior lining made entirely in aluminium

9

PRODUCTS OF TESTED AND CERTIFIED STRENGTH

- Syncro's van racking system is "GS" certified. "GS" stands for "Geprüfte Sicherheit" or "Proven Safety". The "GS" mark is a voluntary quality mark and shows that a product has been tested by an independent certifying body and found safe for use. Our production plant also has to be inspected on an annual basis.
- The reference standard used for testing is the latest edition of ECE R17, which involves a 50 km/h crash test into a non-deformable barrier.
- A 50 km/h impact with a non-deformable barrier more or less corresponds to a 100 km/h impact with another vehicle. Luckily, most accidents occur at far lower speeds.

A racking system ready for testing

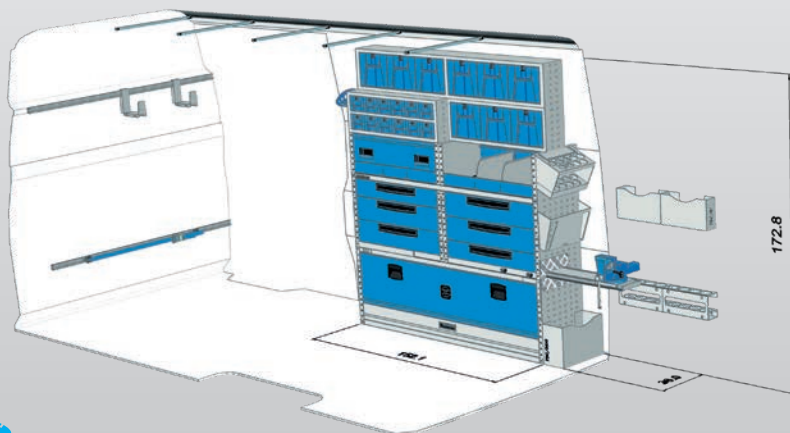

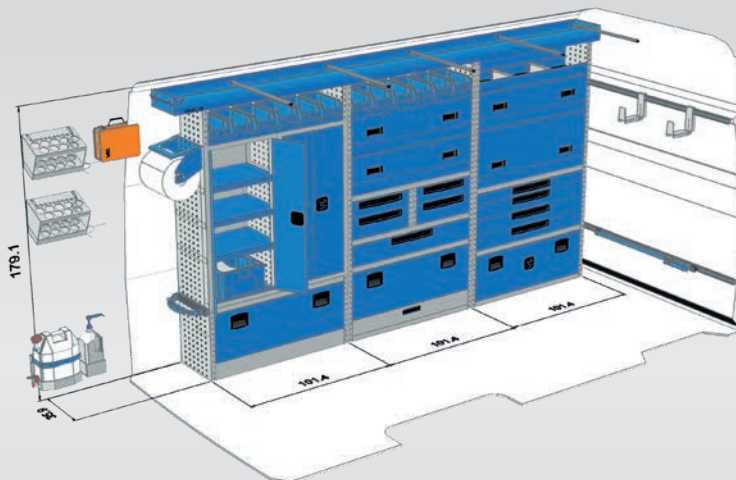

The same racking after testing

10

DESIGNING YOUR RACKING SYSTEM

- Once you have determined what kind of lining you need for your van's load compartment, the next thing to do is decide on the best configuration and arrangement of shelves, drawers and other modules for your mobile workshop.
- Start by considering what bulky tools and materials you need for your job, then provide adequate space for them inside the van.

CALL US FOR A COST-FREE AND OBLIGATION-FREE CONSULTATION!

Phone +39 0424 570062

info@syncro-system.com - <http://www.syncro-system.com/>

11

THE BEST-SELLER: CASES FOR CARRYING TOOLS AND MATERIALS ON SITE

If you need to carry parts or tools around with you on site, these cases are for you. Available in metal, plastic and aluminium/ABS.

- Our classic heavy duty cases in high strength steel can be fitted with modular plastic containers or internal dividers as needed.
- Our innovative Galaxy cases feature a transparent cover in super-tough PMMA. They can be organised using the same containers as our metal cases or fitted with dedicated dividers.
- Our professional ABS and aluminium cases are just the job for carrying around delicate tools and equipment.
- All our tool and component cases can be stowed away in Syncro case trays.

12

SECURING TOOL CASES

- Most technicians and tradesmen need to use power tools of one sort or another, and today these nearly always come with their own carrying cases.
- It's always a good idea to provide a space for storing tool cases and some system for securing them during transport.

- Sloping case trays are one solution for carrying cases safely. Syncro case trays adapt easily to all case sizes thanks to mobile case stops.

13

SHELVES WITH DIVIDERS

- Syncro shelves are unbeatable for carrying all kinds of materials.
- Easy to configure thanks to modular dividers.
- Available with a gas spring operated tilting door.
- Made in high strength steel for maximum resistance.
- All shelves come with mats in non-slip material.

- Our configurable shelves are available with fronts and rears of the same height or in a high-capacity trapezoid version with space dividers of the same shape.

**THE MOST POPULAR CHOICE WITH
SYNCR0 SYSTEM CUSTOMERS,
ALONG WITH DRAWERS ON
TELESCOPIC RUNNERS!**

14

DRAWERS WITH TELESCOPIC RUNNERS

- Syncro drawers are extremely useful for carrying large quantities of small to medium size parts and materials in a secure and orderly manner.
- All versions come with robust, ball-bearing mounted telescopic runners and a system that locks them shut automatically.
- Made in high strength steel for maximum robustness and minimum weight.
- Complete with easy-to-position dividers and non-slip mats.
- Can be fitted with containers for small parts.

15

REMOVABLE CONTAINERS

- Removable, oil-resistant polypropylene containers represent another solution for storing spare parts.
- These can be removed and carried with you on site, or simply used to pick out the parts you need from the shelf, leaving the containers locked securely in place.

**NEW
2023**

VISION **BOX**

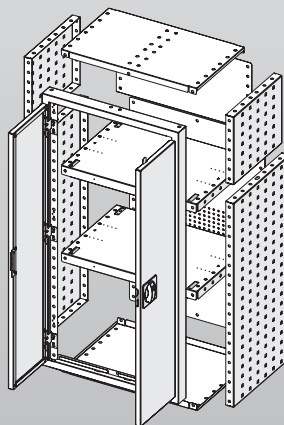

New for 2023: containers in impact resistant polypropylene
Optional transparent front cover and/or aluminium dividers.

16

SECURE STORAGE FOR TOOLS AND MATERIALS THANKS TO SYNCRO'S EXCLUSIVE MODULAR LOCKERS

- Syncro's modular lockers feature lockable steel doors and can be fitted with internal shelves, drawers and containers to carry all your valuable tools tidily and securely.

17

EFFORTLESS LOADING AND UNLOADING THANKS TO SYNCRO RAMPS AND STEPS

- If you need to carry trolleys, machines on wheels or even motorcycles, we can provide fixed or removable ramps with load capacities of up to 1800 kg.

FIXED LOADING RAMPS

Ramp fully extended

Ramp swung to one side for unrestricted access to the cargo compartment

Ramp closed

CALL US FOR A COST-FREE AND OBLIGATION-FREE CONSULTATION!

Phone +39 0424 570062

info@syncro-system.com - <http://www.syncro-system.com/>

REMOVABLE LOADING RAMP

- Made from aluminium for strength and low weight, removable loading ramps do not require installation in the van. Load capacity up to 500 kg.

WINCH WITH TRACTIVE FORCE OF 1,587 KG AND REMOTE CONTROL

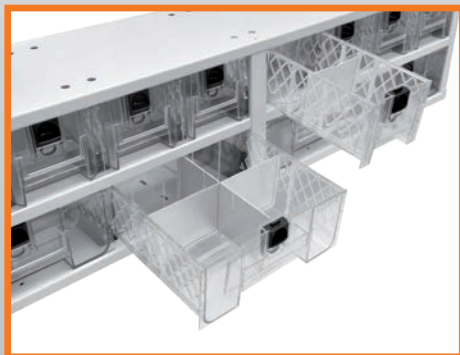

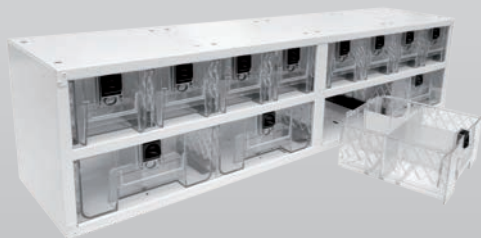

- Combined with a Syncro ramp, this compact but powerful winch with a 12V motor makes loading and unloading even the heaviest loads easy.

18

Multi Box**OUR EXCLUSIVE RANGE
OF TRANSPARENT
CONTAINER CABINETS**

- If you prefer having all your small and medium size parts and components permanently visible, our transparent containers provide the perfect solution. Thanks to their compact dimensions these units can be positioned wherever it is most convenient.
- Limited depth to avoid taking up too much space in the van.
- Transparent material permits instant identification of contents without having to waste time looking inside.
- Made from PMMA: the same super-tough and long-lasting material used to make aircraft windows!

Multi Box

Four models of pull-out transparent container and four models of tilting transparent container: the widest range of container sizes!

Multi Box

THE COMPLETE RANGE OF PATENTED TRANSPARENT DRAWERS

Made from PMMA: the same super-tough
and long-lasting material used
to make aircraft windows!

19

CARRYING LONG ITEMS

- Long items like pipes and cable channels can be carried in special open trays installed as the last element under the roof.

- Long items can be carried in pipe carriers on the roof.

20

WORK BENCHES

- You can install a robust work bench with a 25 mm plywood top in order to work efficiently inside your van.

Choose a version with stainless-steel covering for heavy-duty use and easier cleaning!

21

VICE BENCHES

FORTIX

- Thanks to our pull-out and fold-away vice benches, you can even carry a vice for holding parts as you work on them.

Pull-out vice bench

Fold-away vice bench with patented, automatic support

22

GOOD LIGHTING

- Another important consideration is the provision of good lighting inside the load compartment so that you can see and access contents easily.
- Our LED lights are extremely useful replacements for the typically poor original lights, and run on the 12 V power supply from your van's battery.
- Also consider whether you need to illuminate a work area outside the van and signal that work is in progress by means of a rotating orange beacon.

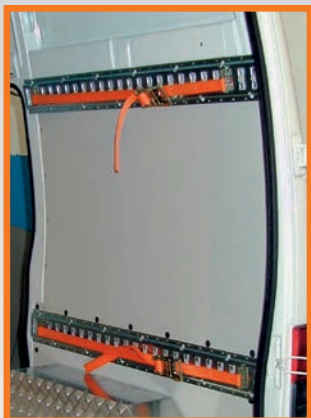

Powerful, military standard LED bars for lighting the area around the van

23

SECURING CARGO

- Remember that the law requires loads to be transported in safety.
- Syncro System offers various types of cargo securing systems to satisfy this requirement.

SYNCRBLOCK

Secure your tools and equipment with an aluminium bar, sliding fittings for hooks and DIN EN 195-2 straps

AAT00018 aluminium slider bar can be used with a wide range of sliding fittings, straps, tool clips, rings and rubber profiles. Different components can be combined with great flexibility and can slide the full length of the bar. The bar can be fitted to the vehicle's bodywork or to Ultra racking components. Thanks to the rail at the rear, AAT00018 bar can be fixed to the holes in Ultra racking using special square-head screws without having to drill the bar.

SYNCROBLOCK profile

Powerful neodymium magnets for use with slider bars.

Steel hooks

Plastic tool clips

Anti-scratch rubber profile and DIN EN 195-2 straps

24

CARRYING LADDERS IN
YOUR VAN

- In one form or another, ladders are essential items of equipment for most professional van users.
- Syncro has developed a series of solutions for carrying ladders easily and safely.
- Our practical ladder rack lets you load ladders safely and effortlessly on to the roof of your van.
- Our multi-purpose cargo lashing system lets you stow smaller ladders inside your van's load compartment.
- Our under-roof ladder rack is ideal for carrying step ladders inside the van, under the roof.
- Ladders can also be fixed to the van's side walls using our wide range of lashing straps and hooks.

info@syncro-system.com - <http://www.syncro-system.com/>

25

JERRY CANS FOR LIQUIDS

- Our metal and plastic jerry cans are ideal for transporting liquids like oils, fuels and chemical products. They all come with metal holders.
- They also combine easily with other items of van equipment.

26

NO MORE LIQUID SPILLAGES WITH SYNCRO'S STAINLESS-STEEL TRAYS

- These new, sealed, stainless-steel trays prevent accidental spillages of oils, fuels and other liquids.
- The trays are easy to remove for emptying and cleaning if needed.

27

CLEANING ACCESSORIES

- Syncro has some great accessories for cleaning hands, materials and tools.
- They include paper roll holders, water containers with a tap, soap and alcohol-based gel dispensers, sinks and wipes.

28

FOLD-AWAY SHELVES FOR COURIER SERVICES

- Fold-away shelves provide a great new way to carry cargo and let you move items around safely and easily whenever needed.
- The shelves open out and fold away in next to no time.

29

USING LONG UNDERFLOOR DRAWERS TO MAXIMISE SPACE IN YOUR VAN

- Syncro's long underfloor drawer units are made from high-strength steel and come in lengths between 700 and 1,340 mm. The drawer handles incorporate an automatic retaining mechanism. The drawers themselves come complete with non-slip mats and movable aluminium dividers. The ball-bearing runners allow the drawers to be fully opened and support loads from 70 to 150 kg.
- Whether installed under or over floor liners, long drawer units always ensure easy access to contents.
- Syncro's underfloor drawers let you carry tools and equipment in a safe, orderly fashion even in small vans.

Under-floor drawer unit

Drawers above the floor accessible from the side door

A shelf for ladders and other long objects

An underfloor drawer at the side door

30

LIFTING HEAVY LOADS WITH A VAN HOIST

- Our manual swinging hoist incorporates a powerful electric motor and is ideal for loading and unloading equipment weighing up to 200 kg.
- The hoist is rigidly secured to the van body by a tubular frame.
- It folds away neatly and occupies very little space when not in use.

31

USING A PC IN THE LOAD COMPARTMENT OR CAB

- A lockable compartment (large enough to hold a printer too!) lets you use a laptop in your van's load compartment.
- Thanks to our hinged writing board kits, any metal drawer can be turned into a practical storage unit and desk for your laptop.
- Alternatively, you can install our fully adjustable and easy to fit PC stand wherever you want in the cab.

32

LOW-NOISE ROOF RACKS THANKS TO SYNCRO SYSTEM'S INNOVATIVE ULTRASILENT PROFILE

- If you need to load material on the roof too, we have a range of roof bars, roof racks with side fences and rear loading rollers, up and over ladder racks, hydraulically assisted ladder racks and stainless steel transport tubes.
- Because Syncro roof racks are completely modular, you are sure to find the perfect solution for your own needs.
- If you need to climb on to the roof of your van, we can also fit an access ladder on your van's rear door.

Unrivalled comfort on the road! Thanks to the exclusive ULTRASILENT ridged profile, Syncro has reduced the noise and vibration generated by your roof rack to an absolute minimum!

WITHOUT ULTRASILENT: the "Von Karman street effect" generates noise and vibration.

WITH ULTRASILENT: the ridged profile prevents the formation of noisy air flows.

EXCLUSIVE SOLUTION! LESS NOISE THAN EVER WITH OUR ULTRASILENT PROFILE

ROOF RACK WITH SIDE FENCES AND LOADING ROLLER

PIPE CARRIER WITH DOOR

CROSS-BARS

LADDER RACKS for the easy loading and unloading of ladders

Roof racks with one or two ladder slides and a pipe carrier

Stainless-steel walkway for installation on your van's roof

ROOF ACCESS LADDERS for safe access to your van's roof

33

ALL THE POWER YOU NEED FOR AN EFFICIENT MOBILE WORKSHOP!

- You can choose all the power sources you need to operate efficiently, safely and professionally from the wide range of solutions offered by Syncro System. Accessories are available in self-powered versions and versions powered by the engine of your van.

GENERATORS, COMPRESSORS, INVERTERS, PRESSURE WASHERS, HYDRAULIC POWER UNITS, WELDING MACHINES, ETC.

Inverters

INVERTERS for a 220 V power supply even without a generator

Powerful compressor-generator combo

A compressor-generator combo on a slide

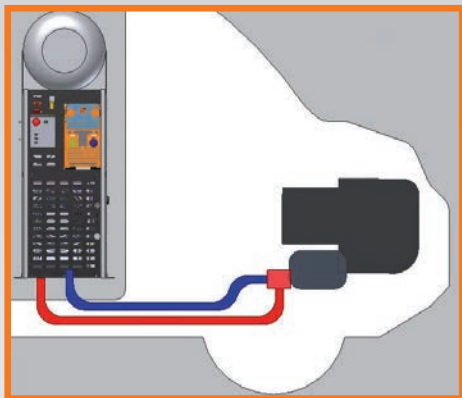

An innovative OIL-FREE compressor

**UP TO 1000 LITRES/MINUTE OF COMPRESSED AIR
AND 16 kVA OF ELECTRICAL ENERGY!**

POWERFUL COMPRESSOR-GENERATOR COMBOS DRIVEN BY YOUR VAN'S OWN ENGINE

These powerful, reliable and compact machines harness the power of your van's engine to generate electrical energy, compressed air and hydraulic power.

A COMPRESSED AIR SUPPLY WITH NO NEED FOR A GENERATOR OR INVERTER: 12V COMPRESSORS!

- These powerful, compact compressors connect directly to your van's battery to provide compressed air when no mains supply is available!

TAKE WHERE YOU WANT ALL THE POWER YOU NEED THANKS TO THE ECOFLOW POWER STATIONS!

The amazing ECOFLOW portable power stations incorporate a lithium battery, an efficient and versatile battery charger and a powerful, pure sine wave inverter. They can be charged rapidly from a 220 VAC mains supply, from your vehicle's 12 V alternator or even directly from solar panels thanks to a built-in charging controller. With up to 3,600 W, these units can power a wide variety of tools and equipment. X-Boost technology even permits loads of up to be 4,500 W to be supported. Excellent peak current control allows these units to drive even power-hungry machines like air compressors. Ecoflow units are fitted with 220 VAC and 12 VDC power sockets and a variable number of USB ports. Battery capacity is up to 3,600 Wh, and is 100% usable. Additional batteries can be installed to boost total capacity to 10,800 Wh.

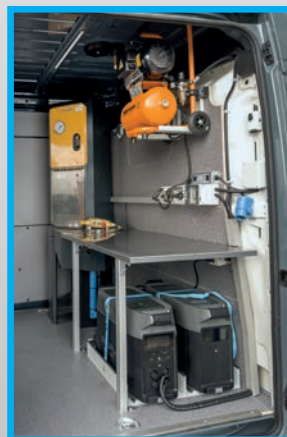

Ecoflow power stations can drive even the most power-hungry tools.

An Ecoflow power station driving a compressor.

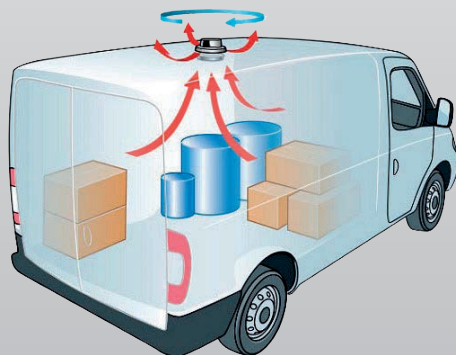

A mobile workshop powered entirely by Ecoflow power stations and supplementary batteries.

34

A HEALTHIER WORK ENVIRONMENT THANKS TO A WIND-DRIVEN ROTARY EXTRACTOR

Stale air, unpleasant odours, condensation and sweltering heat have a negative impact on any workplace. Inside a van, these conditions can cause discomfort and ill health, spoil goods and packaging and even damage the interior of the bodywork. In the worst case scenario, fumes, toxic chemicals or inflammable gases can even prove lethal. The VENT-ROT wind-driven extractor ensures an efficient air exchange in the back of your van: it extracts fumes, helps control temperature and prevents the formation of condensation.

35

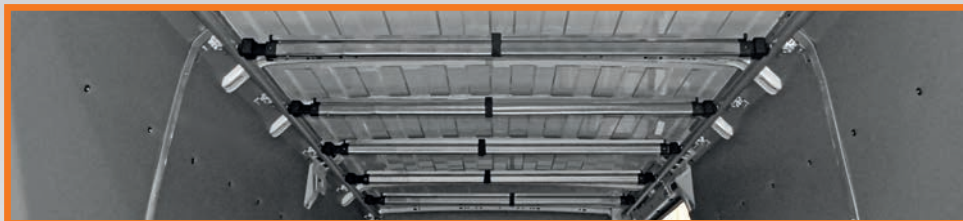

VAN AWNINGS

- Crank-action awnings with telescopic legs are the perfect solution for anybody needing an external work area protected against the sun and rain.

36

EQUIPMENT FOR HANGING GARMENTS

Hanging garments can be carried in your van safely and easily. Syncro's hanging garment bars incorporate a spring-loaded system that allows them to be fixed to and removed from their support rails quickly and easily. Rails can be positioned as needed, so that you can exploit the space in your van in the most efficient way possible.

37

EQUIPMENT FOR PICKUPS

Syncro's underfloor drawers for pickups are designed to exploit all available space in the back of your vehicle.

38

REUSING YOUR RACKING

- Sooner or later the time will come when you need to change your van. Luckily, Syncro racking is completely modular, so it is easy to remove it from your old van and install it in your new one, adding other components or accessories as needed.

39

AN INVESTMENT DESIGNED TO LAST

- It is important to consider your van racking as an investment.
- The price you pay for it will be more than recovered in time-saving at work.
- The top quality and durability of Syncro components will allow you to amortise your investment in a short time, and enjoy many years of practicality and convenience.
- Syncro products are made to last and to withstand the stresses and strains they are subjected to in daily use. Syncro racking is extremely robust and durable as well as completely modular.

40

A MORE PROFESSIONAL
IMAGE

- It's true that appearances can be deceptive, but it's equally true that first impressions count.
 - A Syncro racking ensures that customers get a good impression of your professionalism!
 - Before they get to know you, your customers can only judge you by your appearance.
- A Syncro racking system makes sure that you look good on your first visit.

41

FINANCE FOR YOUR UPFIT

- The cost of your Syncro racking can be included in the finance or leasing agreement for your new vehicle.

42

WARRANTY

- All items in the Syncro racking system are guaranteed for 3 years against manufacturing defects. Under the terms of this warranty, any defective parts will be repaired or replaced. Articles produced by other companies, such as generators or compressors, are covered by the warranty of the manufacturer.

43

RAPID INSTALLATION & INSTANT SERVICE

- Vehicle idle time is reduced to a minimum: it rarely takes more than one day to install racking in a van. Under certain conditions, idle time can be only a matter of minutes.
- You can save time by having us rack your new van while all its documents are being prepared. By the time the documents are ready, your van will be ready too!

44

RAPID RETURN ON INVESTMENT

- The time needed to amortise your investment obviously depends on your earnings, but supposing that efficient racking saves you 30 minutes a day, your racking would pay for itself in 6 to 24 months, considering the time and money you would otherwise lose.

ANNUAL SAVING

Assuming 30 minutes of time saved a day
= 3,300 €

45

SUPPLY OF MATERIAL ALONE

- You only need standard hand tools to install Syncro racking in your van, so there's nothing stopping you doing it yourself. Racking can be supplied complete with all the material needed to install it, inclusive of screws, brackets and instructions. Obviously, if you want a professional result, it's essential to follow our instructions meticulously.

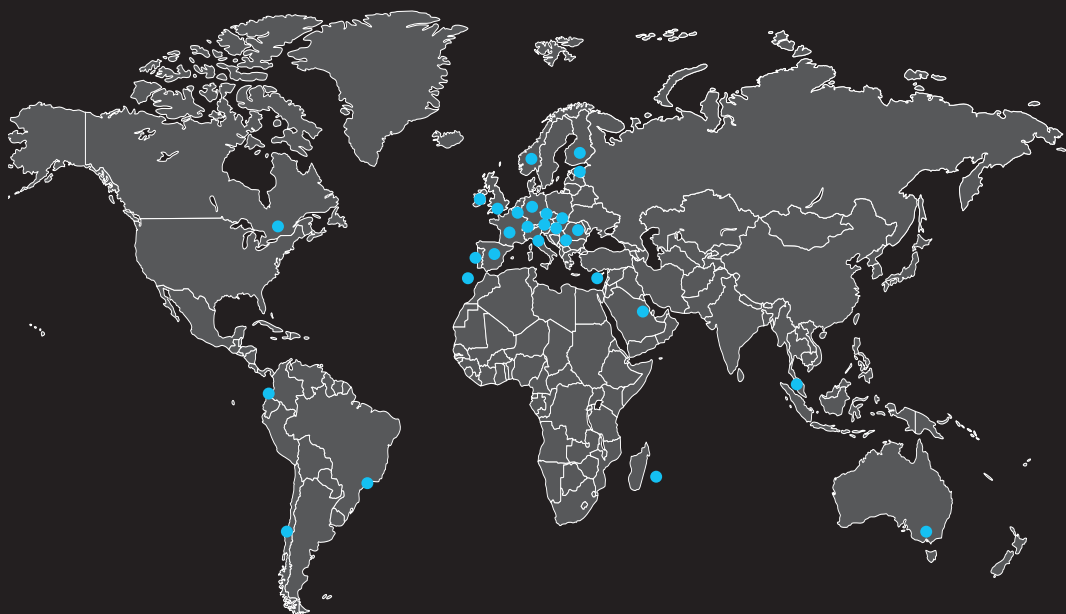

46

TRUST THE EXPERTS

- Syncro System has installed racking in 90,000 vans in the last 25 years, for all kinds of tradesmen and professionals, and in all parts of the world. So our installation teams have plenty of experience and are perfectly qualified to give you all the information and advice you need to find the right solution for your own specific requirements.

SYNCRO SYSTEM ACHIEVES ALMOST 100% CUSTOMER SATISFACTION

A survey of 208 Syncro System customers carried out by **Cerved** in July 2022 found that satisfaction with service was almost 100%, and that Syncro's service even exceeded the expectations of 39% of customers. Customer Satisfaction Index, which reflects customer satisfaction for all aspects of the supply, was rated at a flattering 98%, showing that Syncro System performs extremely well in all areas.

Which customers declare themselves satisfied?

100% of customers are satisfied with the service, 39% even state that SYNCRO SYSTEM exceeded their expectations. None of the customers declared a level of satisfaction below expectations.

CONSIDERING SYNCRO SYSTEM'S ACTIVITY AS A WHOLE IN ALL ITS ASPECTS AND THE EXPERIENCE OF THE LAST YEARS, DO YOU BELIEVE THAT SYNCRO SYSTEM HAS OFFERED YOU WORSE, EQUAL OR BETTER SERVICE THAN EXPECTATIONS?

100% SATISFIED CUSTOMERS

Customer satisfaction index: Syncro System performs very well in all areas

Everything appears to be very aligned in terms of performance indicators. The Customer Satisfaction Index stands at a very high level of 98 points out of 100. The other detailed indicators are also at the same level. The least performing area is that of the North East.

Customer satisfaction index (CSI) 98

**REF. COMMERCIAL
AND OFFER PROCESSING**

**ORDER
MANAGEMENT**

**ADMINISTRATION AND
CUSTOMER SERVICE**

The CSI (Customer Satisfaction Index) measures overall satisfaction on a 1-100 scale through the bottom-up process of factor re-aggregation.
